# Agile Project Management (AgilePM®) Practitioner - accredited training with exam

# Purpose of the training

For persons responsible for commissioning, implementation and supervision over the course of projects, regardless of the industry. Sponsors, project managers and team members and members of project offices. Analysts, programmers and testers. For all those working in a design environment who want to use AgilePM®'s agile project management concept and want to pass the AgilePM® Practitioner exam.

# Benefits of completing the training

The aim of the training is to prepare students for the AgilePM® Practitioner exam based on the Agile Project Management methodology in version 2.0, developed in cooperation with APMG-International and DSDM® Consortium. Ends with the AgilePM® Practitoner exam. Passing the exam means getting an international AgilePM® Practitioner certificate.

# **Expected Listener Preparation**

It is required to have an AgilePM Foundation or DSDM Atern Foundation certificate or DSDM Advanced Practitioner.

Note: it can be conducted in Polish or English, depending on the agreement. This also applies to materials and presentations for participants and the language in which the exam will be conducted. Authorized manual is not included in standard materials, it can be purchased (recommended) in Polish or English language version. The exam is carried out on the last day of class.
