E-Learning - Cisco Application Centric Infrastructure Operations and Troubleshooting (DCACIO)

The Cisco Application Centric Infrastructure Operations and Troubleshooting (DCACIO) v5.2 course shows you how to manage, monitor, and troubleshoot Cisco Nexus 9000 Series Switches in Application-Centric Infrastructure (ACI) mode.

Through expert instruction and hands-on practice, you will learn about operational tools, best practices, caveats, and practice troubleshooting common issues on a live fabric. Based on lessons learned in wide range of production deployments, this course gives you the real-world knowledge and skills to boost operational efficiencies in your own deployment.

Access Duration: 180 days

Continuing Education Credits: 24

Purpose of the training

IT professionals who operate and support a Cisco ACI data center network, including:

- Data center engineers
- Field engineers
- Network engineers

- Systems engineers
- Cisco integrators/partners
- Consulting systems engineer
- Technical solutions architect
- Service administrator
- Network manager

Benefits of completing the training

This course will help you:

- Quickly ramp up on Cisco ACI® operational knowledge, skills, and best practices honed from realworld production deployments
- Gain hands-on troubleshooting techniques
- Optimize the benefits of using Cisco ACI, such as streamlined operations

Expected Listener Preparation

To fully benefit from this course, you should have the following knowledge and skills:

- Understanding of ACI architecture and concepts need to get an ACI fabric into production
- Familiarity with data center infrastructure operations
- Familiarity with management of Cisco data center switches
- Data center operations

The following course will provide you with the required ACI skills:

- Implementing Cisco Application-Centric Infrastructure (DCACI)
- Implementing and Administering Cisco Solution (CCNA)
- Understanding Cisco Data Center Foundations (DCFNDU)

Training Language

Language: English Materials: English

Training Includes

- Labs
- Self-Paced Training

Duration

1 days / 1 hours

Training agenda

- Describe the Cisco ACI built-in tools for operating and monitoring the fabric
- Describe the complex challenges related to monitoring and Cisco tools that address them: Cisco Nexus Dashboard and Cisco Nexus Dashboard Insights
- Describe fabric installation upgrade, backup, restore, and best practices for Cisco NX-OS-to-ACI migration and Cisco ACI management access
- Describe the tools and best practices for monitoring ACI fabric
- Describe best practices for Cisco ACI naming conventions, Day-0 configuration, VMM integration, and Cisco ACI migrations
