

Event Storming - workshop

Purpose of the training

Workshop is intended for groups who want to start using the Event Storming tool to discover and specify knowledge about the business domain with which they are currently working/designing. Event Storming is nothing more than finding common ground on the line business <> IT tech team

Benefits of completing the training

Participants know what Event Storming is for and how it can be used in everyday work. Participants are able to facilitate such workshop in the further work with the product.

Expected Listener Preparation

Participant can be anyone from the project team (developers, analysts, project managers, product owners etc.)

Nice to have:

- DDD (Domain Driven Design) knowledge
- experience with event driven architectures (CQRS, EventSourcing)

Training Language

- Training: English

Training Includes

Training method:

- Workshops

Duration

2 days / 14 hours

Training agenda

1. Theoretical intro

- What is Event Storming?
- Why should we use ES?
