

PeopleCert Scrum Product Owner I - accredited training with exam

Scrum is a framework that helps teams work together. It increases team productivity by encouraging team players to learn through experiences, self-organise, and continuously improve.

IT teams use Scrum to develop, deliver, and maintain complex software products. However, Scrum principles can be applied to all kinds of areas: research, sales, marketing, and customer support - to name a few.

Based on Agile principles, it enables teams to self-organise by encouraging close collaboration between all team members and specialisms involved. Scrum challenges the assumptions of the sequential approach to product development and replaces it with an iterative process. It includes a set of meetings, tools, and roles that work in harmony to help teams structure and manage their work.

The goal of this approach is to timely capture changes in customers' needs, along with any other unpredictable challenges that may occur — for which a sequential approach is not suited. As such, Scrum uses an evidence-based framework that embraces the fact that problems cannot be fully defined upfront. Instead, it focuses on maximising the team's ability to respond to emerging requirements, deliver value quickly, and adapt to new market conditions.

Purpose of the training

This certification is the first level of the PeopleCert Scrum Product Owner qualification scheme provided

by PeopleCert and is aimed at anyone who wishes to become an efficient member of a Scrum environment and requires candidates to have and demonstrate a solid knowledge and understanding of the Scrum terms, principles, tools and practices, as well as demonstrate their application skills of how to use tools efficiently and effectively. The certification can also cater for candidates seeking personal certification.

This certification will provide all the required level of knowledge to its holders and will certify that they have a solid understanding of Scrum using various tools.

Benefits of completing the training

Candidates will understand the Scrum framework and the role of the Product Owner, learn about Value-Driven Product Management and how to successfully build and refine the Product Backlog, and enable yourself and your organisation to deliver products of the highest value.

Examination method

The participants receive vouchers, which are valid for 6 months, for online exam.

Having completed the training, the participant receives an e-mail with guidelines how to register on the exam. The date is determined directly with PeopleCert, with the use of participant's account.

Online exam is conducted in the presence of proctor – a person from PeopleCert, who connects remotely with training participant's desktop and observes the course of exam via Internet camera.

The person who takes the exam is obliged to show the place where he is going to write the exam to proctor via Internet camera. Proctor checks if there are not any other persons and study aids in the room.

After passing the exam, the participant will receive an international certificate in electronic form.
