

TOGAF® Workshop for Practitioners (Level 1) - Distance Learning

Purpose of the training

The training is aimed at people who want to acquire basic knowledge about the standard of the architectural framework TOGAF® 9.2. In particular, there is a training addressed to corporate and domain architects, but also to all other people who will take an active part in the architectural process. In this group, you can specify the representatives of business departments responsible for the strategy of cooperation with IT, program and project managers, analysts and business designers, analysts and system designers.

Benefits of completing the training

TOGAF® Workshop for Practitioners (Level 1) covers a full set of issues defined by The Open Group in a syllabus, providing the necessary knowledge required to apply for the TOGAF® 9 Foundation certificate. Completing the training will allow you to prepare well for the certification exam.

Also allows to learn the basic concepts and vocabulary used in the field of Corporate Architecture, necessary for efficient communication as part of architectural and transformation projects. It allows for the conscious and correct application of these concepts in practice.

Altikom Akademia S.A. holds the prestigious Gold Member status in The Open Group. Our trainers take an active part in the development of standards and in architectural projects. It is a space for sharing knowledge – both theoretical and practical.

TOGAF® Workshop for Practitioners training is accredited by The Open Group.

Expected Listener Preparation

Participation in training – WAK – Introduction to Corporate Architecture

As a supplement, we recommend:

- TG-ARM – ArchiMate® Workshop for Practitioners
- AKWP – Corporate Architecture – a practical workshop
