Securing Cisco Networks with Snort Rule Writing Best Practices

The Securing Cisco Networks with Snort Rule Writing Best Practices (SSFRules) v2.1 course shows you how to write rules for Snort, an open-source intrusion detection and prevention system. Through a combination of expert-instruction and hands-on practice, this course provides you with the knowledge and skills to develop and test custom rules, standard and advanced rules-writing techniques, how to integrate OpenAppID into rules, rules filtering, rules tuning, and more. The hands-on labs give you practice in creating and testing Snort rules.

Przeznaczenie szkolenia

This course is for technical professionals to gain skills in writing rules for Snort-based intrusion detection systems (IDS) and intrusion prevention systems (IPS). The primary audience includes:

- Security administrators
- Security consultants
- Network administrators
- System engineers
- Technical support personnel using open source IDS and IPS

Korzyści wynikające z ukończenia szkolenia

This course will help you:

- Gain an understanding of characteristics of a typical Snort rule development environment
- Gain hands-on practices on creating rules for Snort
- Gain knowledge in Snort rule development, Snort rule language, standard and advanced rule options

Oczekiwane przygotowanie słuchaczy

o fully benefit from this course, you should have:

- Basic understanding of networking and network protocols
- Basic knowledge of Linux command-line utilities
- Basic knowledge of text editing utilities commonly found in Linux
- Basic knowledge of network security concepts
- Basic knowledge of a Snort-based IDS/IPS system

Język szkolenia

- Szkolenie: polski
- Materiały: angielski

Czas trwania

3 dni / 21 godzin

Agenda szkolenia

Course outline

- Introduction to Snort Rule Development
- Snort Rule Syntax and Usage
- Traffic Flow Through Snort Rules
- Advanced Rule Options
- OpenAppID Detection
- Tuning Snort

Lab outline

- Connecting to the Lab Environment
- Introducing Snort Rule Development

- Basic Rule Syntax and Usage
- Advanced Rule Options
- OpenAppID
- Tuning Snort
